

## Technical Specification

# **Design of post-installed and cast-in fastenings for use in concrete**

This Australian Technical Specification was peer reviewed by Committee ME-029, Fasteners. It was approved on behalf of the Council of Standards Australia on 14 December 2015. This Technical Specification was published on 23 December 2015.

---

The following are represented on Committee ME-029:

- Association of Accredited Certification Bodies
  - Association of Wall and Ceiling Industries of Australia & NZ
  - Australasian Corrosion Association
  - Australian Chamber of Commerce and Industry
  - Australian Engineered Fasteners and Anchors Council
  - Australian Industry Group
  - Australian Steel Institute
  - AUSTROADS
  - Bureau of Steel Manufacturers of Australia
  - CSIRO
  - Galvanizers Association of Australia
  - Materials Australia
  - National Association of Steel-Framed Housing
  - National Association of Testing Authorities Australia
  - New Zealand Heavy Engineering Research Association
  - Society of Automotive Engineers Australasia
  - Steel Construction New Zealand
  - Swinburne University of Technology
- 

Standards Australia wishes to acknowledge the participation of the expert individuals that contributed to the development of this Technical Specification through their representation on the Committee.

---

#### **Keeping Standards up-to-date**

Australian Standards® are living documents that reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued.

Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments that may have been published since the Standard was published.

Detailed information about Australian Standards, drafts, amendments and new projects can be found by visiting [www.standards.org.au](http://www.standards.org.au)

Standards Australia welcomes suggestions for improvements, and encourages readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at [mail@standards.org.au](mailto:mail@standards.org.au), or write to Standards Australia, GPO Box 476, Sydney, NSW 2001.

## PREFACE

This Australian Technical Specification was prepared by an expert committee representing relevant organisations listed in the acknowledgements and peer reviewed by the Standards Australia Committee ME-029, Fasteners.

The objective of this Australian Technical Specification is to provide minimum design requirements for fastenings used to transmit loads to concrete for safety-critical applications.

The term ‘normative’ has been used in this Australian Technical Specification to define the application of the appendices to which they apply. A ‘normative’ appendix is an integral part of an Australian Technical Specification.

Requests for interpretations or suggestions for improvement should be forwarded in the first instance to Standards Australia.

## ACKNOWLEDGEMENTS

This Australian Technical Specification was instigated by the Australian Engineered Fasteners and Anchors Council ([www.aefac.org.au](http://www.aefac.org.au)) and developed by a committee comprising the following organisations:

Allthread Industries Pty Ltd  
Ancon Building Products  
Australian Building Codes Board  
Australian Engineered Fasteners and Anchors Council  
Australian Steel Institute  
Australian Window Association  
Commonwealth Scientific and Industrial Research Organisation (CSIRO)  
Concrete Institute of Australia  
Edith Cowan University  
Engineers Australia  
Hilti (Aust.) Pty Ltd  
Hobson Engineering Company Pty Ltd  
Housing Industry Association Ltd  
ITW Construction Systems  
National Precast Concrete Association Australia  
Simpson Strong-Tie  
Stanley Black & Decker Australia Pty Ltd (Powers)  
Swinburne University of Technology  
Würth Australia Pty Ltd

## CONTENTS

1	Scope and General .....	1
1.1	Scope and application .....	1
1.2	References .....	2
1.3	Definitions .....	2
1.4	Notation .....	7
2	Materials and installation .....	9
2.1	General .....	9
2.2	Types of fasteners and fastener groups.....	9
2.3	Dimensions of fasteners .....	9
2.4	Fastener materials.....	10
2.5	Concrete.....	10
2.6	Reinforcement .....	10
3	General design requirements .....	11
3.1	General .....	11
3.2	Verifications for design .....	11
3.3	Concrete condition.....	12
3.4	Verification of fastener strength.....	12
4	Determination of forces acting on fasteners .....	22
4.1	General .....	22
4.2	Post-installed fasteners .....	22
4.3	Anchor channel.....	27
4.4	Supplementary reinforcement.....	28
5	Detailing of supplementary reinforcement.....	30
6	Design for tensile loading.....	32
6.1	General .....	32
6.2	Post-installed fasteners .....	32
6.3	Cast-in anchor channel .....	45
7	Design for shear loading.....	52
7.1	General .....	52
7.2	Post-installed fasteners .....	52
7.3	Cast-in anchor channel .....	60
8	Design for combined tension and shear loading.....	65
8.1	Steel failure.....	65

8.2	Failure modes other than steel .....	66
8.3	Additional verification for fasteners with supplementary reinforcement .....	67
9	Design for serviceability .....	69
10	References .....	70
	Appendix A – Notation .....	72
	Appendix B – Testing and assessment of fasteners .....	80
	B.1 Testing procedures and reporting .....	80
	B.2 Assessment requirements and reporting .....	81
	Appendix C – Means for demonstrating compliance with this standard .....	84
	C.1 Installation .....	84
	C.2 Statistical sampling .....	84
	C.3 Manufacturing requirements .....	84
	C.4 Registered Testing Authority .....	84
	C.5 assessment body .....	84
	C.6 Demonstration of product suitability .....	84
	Appendix D – Verification of resistance strength of concrete elements to loads applied by fasteners .....	86
	D.1 General .....	86
	D.2 Lightly loaded applications .....	86
	Appendix E – Assumptions for the design and installation of fasteners .....	88
	E.1 General .....	88
	E.2 Post-installed fasteners .....	88
	E.3 Anchor channel .....	88
	Appendix F – Simplified method of design for post-installed fasteners .....	90
	F.1 General .....	90
	F.2 Design method A .....	90
	F.3 Design method B .....	90
	F.4 Design method C .....	91
	Appendix G – Commentary .....	93
