**Mineral wool thermal insulation—  
Batt and blanket**

---

This Australian Standard was prepared by Committee BD/58, Thermal Performance and Insulation of Dwellings. It was approved on behalf of the Council of Standards Australia on 21 July 1989 and published on 9 February 1990.

---

The following interests are represented on Committee BD/58:

Acceptable Standards of Construction Committee, New South Wales  
Aluminium Development Council  
Association of Municipal Electricity Authorities, Victoria  
Australian Cellulose Insulation Manufacturers' Association  
Australian Federation of Consumer Organizations  
Australian Institute of Building  
Australian Institute of Refrigeration, Air Conditioning and Heating  
Australian Uniform Building Regulations Coordinating Council  
Business and Consumer Affairs, New South Wales  
Clay Brick and Paver Institute  
CSIRO, Division of Building, Construction and Engineering  
Construction and Housing Association, Australia  
Department of Administrative Services—Australian Construction Services  
Department of Industry, Technology and Resources, Victoria  
Department of Mines and Energy, South Australia  
Fibreglass and Rockwool Insulation Manufacturers' Association of Australia  
Hydro-Electric Commission, Tasmania  
Ministry of Housing and Construction, Victoria  
National Building Technology Centre  
Plastics Industry Association  
Thermal Insulation Contractors' Association, New South Wales  
University of Adelaide  
University of Melbourne  
Victorian Solar Energy Council

**Review of Australian Standards.** *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

*Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.*

*Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.*

---

*This Standard was issued in draft form for comment as DR 77171.*

## PREFACE

This Standard was prepared by the Standards Australia Committee on Thermal Performance and Insulation of Dwellings and is one of a series of Standards relating to thermal insulating materials.

A new Standard dealing with the methods of installing this type of insulating material in dwellings is in course of preparation. Recommended levels of thermal resistance for the use of this material are set out in the AS 2627 series of which AS 2627.1, *Thermal insulation of dwellings—Design guide, Part 1: Thermal insulation of roof/ceiling in dwellings which require heating*, has been published.

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
