## CORRUGATED STEEL PIPES, PIPE-ARCHES AND ARCHES

This is a free 4 page sample. Access the full version online.

**STANDARDS ASSOCIATION OF AUSTRALIA**  
*Incorporated by Royal Charter*

This Australian standard was prepared by Committee WS/11, Corrugated Metal Drainage Pipes and Arches. It was approved on behalf of the Council of the Standards Association of Australia on 25 May 1983 and published on 9 November 1984.

---

The following interests are represented on Committee WS/11:

Confederation of Australian Industry  
Department of Public Works, N.S.W.  
Metal Trades Industry Association of Australia  
National Association of Australian State Road Authorities  
Public Works Department, Vic.  
Railways of Australia Committee  
Victorian Railways  
University of Adelaide  
University of New South Wales

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian standards are subject to periodic review and are kept up-to-date by the issue of amendments or new editions as necessary. It is important therefore that standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all SAA publications will be found in the Catalogue of Australian Standards; this information is supplemented each month by SAA's journal 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn standards.

Suggestions for improvements to Australian standards, addressed to the head office of the Association, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian standard should be made without delay in order that the matter may be investigated and appropriate action taken.

## PREFACE

This edition of this standard was prepared by the Association's Committee on Corrugated Metal Drainage Pipes and Arches to supersede AS 2041—1977.

The main change in this edition is the introduction of a new corrugation profile for bolted pipes, pipe-arches and arches, and the inclusion of requirements for coupling systems.

The principal purpose of the standard is to lay down essential requirements for the manufacture and purchase of corrugated steel pipes, pipe-arches and arches, as distinct from helical lock-seam corrugated steel pipes which are specified in AS 1761, Helical Lock-seam Corrugated Steel Pipes.

For the guidance of users, the standard includes technical data relating to the load-carrying capacity of pipes, pipe-arches and arches.
