

Australian Standard[®]

FEELER GAUGES

METRIC UNITS

The following scientific, industrial and governmental organizations and departments were officially represented on the committee entrusted with the preparation of this standard:

Associated Chambers of Manufactures of Australia
Australian and New Zealand Railways Conferences
CSIRO, Division of Applied Physics
Department of the Army
Department of Supply (Defence Standards Laboratories)
Department of Supply (Munitions and Aircraft Factories)
Electricity Supply Association of Australia
Federal Chamber of Automotive Industries
Metal Trades Industry Association of Australia
Society of Manufacturing Engineers
The Institution of Engineers, Australia
The Institution of Production Engineers
University of New South Wales
Weapons Research Establishment

This standard, prepared by Subcommittee ME/27/3—Gauges, of the Association's Committee on Metrology, was approved by the Mechanical Engineering Standards Board on behalf of the Council of the Standards Association on 21 February 1974.

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for public review as DR 73093.

PREFACE

This standard was prepared by the Association's Committee on Metrology to assist with the change to the metric system of units. Inch series feeler gauges are specified in AS B134—1955 which is the endorsement of BS 957:1941.

This standard is largely based on BS 957:Part 2:1969 but differs somewhat in arrangement. It covers the thickness range 0.03 to 1.00 mm, and recommends four standard set combinations.
