Withdrawn

The National Standards Authority of Ireland (NSAI) produces the following categories of formal documents:

I.S. xxx: Irish Standard – national specification based on the consensus of an expert panel and subject to public consultation.

S.R. xxx: Standard Recommendation - recommendation based on the consensus of an expert panel and subject to public consultation.

SWiFT xxx: A rapidly developed recommendatory document based on the consensus of the participants of an NSAI workshop.

This document is based on:
EN 1993-1-5:2006

Published:
25 October, 2006

This document was published
under the authority of the NSAI
and comes into effect on:
25 March, 2010

AC1 National Annex Foreword

National Annexes must always be used in conjunction with the relevant European Standard.

National Annexes are reviewed as necessary e.g. when a new edition, an amendment or a corrigendum is issued. This National Annex identifies what amendments/corrigenda are addressed. The user should check that the National Annex addresses the latest changes to the European Standard. Previews of all documents are available on www.standards.ie. Any questions should be directed to NSAI.

Where a European Standard has been changed (revised/amended/corrected) and the National Annex has yet to be revised to account for the change(s), the National Annex for the previous version is available.

Engineering judgement must be applied if using guidance contained therein e.g. when selecting appropriate parameters.

The table below indicates which changes have been considered by the relevant National Committee during the life of this edition of the European Standard.

Publication	Date published	Assessed and taken into account if relevant
I.S. EN 1993-1-5:2006	2007-01-29	Yes
I.S. EN 1993-1-5:2006/AC:2009	2009-01-04	Yes
I.S. EN 1993-1-5:2006/A1:2017	2017-12-19	No

Where relevant this NA includes:

- an overview of possible national choices and clauses containing complementary information;
- national choices;
- decisions on the application of informative annexes;

references to complementary (non-contradictory) information which may assist the user of the Eurocode.

The numbering refers to the clauses of the Eurocode where national choices have been made and/or complementary information is given. To the extent possible, headings are identical to the headings of the clauses in the Eurocode followed by a clarification, as appropriate. **AC1**

Annex NA (informative)

Irish National Annex to Eurocode 3 – Design of steel structures – Part 1-5: Plated structural elements

Introduction

This National Annex has been prepared through the National Eurocodes Advisory Committee. In Ireland it is to be used in conjunction with I.S. EN 1993-1-5:2006+AC:2009.

NA.1 Scope

This National Annex gives:

a) Irish decisions for the Nationally Determined Parameters described in the following subclauses:

— 2.2(5)	— 8(2)	— C.2(1)
— 3.3(1)	— 9.1(1)	— C.5(2)
— 4.3(6)	— 9.2.1(9)	— C.8(1)
— 5.1(2)	— 10(1)	— C.9(3)
— 6.4(2)	— 10(5)	— D.2.2(2)

b) Irish decisions on the status of informative annexes A, B, C and D.
