

Environmental management systems— General guidelines on implementation

AS ISO 14004:2018

This Australian Standard® was prepared by QR-011, Environmental Management Systems. It was approved on behalf of the Council of Standards Australia on 12 February 2018.

This Standard was published on 12 April 2018.

The following are represented on Committee QR-011:

- Association of Accredited Certification Bodies
- Australian Chamber of Commerce and Industry
- Australian Industry Group
- Corporate Environmental Managers Group
- Engineers Australia
- Property Council of Australia
- Certification Interests Australia
- School of Science, Engineering and Health, Central Qld University

This Standard was issued in draft form for comment as DR AS/NZS ISO 14004:2017.

Preface

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee QR-011, Environmental Management Systems, to supersede AS/NZS ISO 14004:2004, *Environmental management systems—General guidelines on principles, systems and support techniques*.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to provide guidance for an organization on the establishment, implementation, maintenance and improvement of a robust, credible and reliable environmental management system. The guidance provided is intended for an organization seeking to manage its environmental responsibilities in a systematic manner that contributes to the environmental pillar of sustainability.

This Standard is identical with, and has been reproduced from, ISO 14004:2016, *Environmental management systems — General guidelines on implementation*.

As this document has been reproduced from an International Standard, the following applies:

- (a) In the source text 'this International Standard' should read 'this Australian Standard'.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms 'normative' and 'informative' are used in Standards to define the application of the appendices or annexes to which they apply. A 'normative' appendix or annex is an integral part of a Standard, whereas an 'informative' appendix or annex is only for information and guidance.

Contents

Preface	ii
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 Terms related to organization and leadership	2
3.2 Terms related to planning	3
3.3 Terms related to support and operation	4
3.4 Terms related to performance evaluation and improvement	5
4 Context of the organization	6
4.1 Understanding the organization and its context	6
4.2 Understanding the needs and expectations of interested parties	10
4.2.1 General	10
4.2.2 Determining relevant interested parties	10
4.2.3 Determining relevant needs and expectations of relevant interested parties	10
4.2.4 Determining compliance obligations	11
4.2.5 Use and application of the needs and expectations of interested parties	11
4.3 Determining the scope of the environmental management system	11
4.4 Environmental management system	12
4.4.1 General	12
4.4.2 Establishing, implementing, maintaining and continually improving an environmental management system	13
5 Leadership	14
5.1 Leadership and commitment	14
5.2 Environmental policy	15
5.3 Organizational roles, responsibilities and authorities	18
6 Planning	19
6.1 Actions to address risks and opportunities	19
6.1.1 General	19
6.1.2 Environmental aspects	23
6.1.3 Compliance obligations	27
6.1.4 Planning action	29
6.2 Environmental objectives and planning to achieve them	29
6.2.1 General	29
6.2.2 Establishing environmental objectives	30
6.2.3 Planning actions to achieve environmental objectives	30
6.2.4 Performance indicators	31
7 Support	32
7.1 Resources	32
7.2 Competence	32
7.3 Awareness	34
7.4 Communication	35
7.4.1 General	35
7.4.2 Internal communication	37
7.4.3 External communication	37
7.5 Documented information	38
7.5.1 General	38
7.5.2 Creating and updating	39
7.5.3 Control of documented information	39
8 Operation	40

8.1	Operational planning and control.....	40
8.1.1	General guidance: Operational control.....	40
8.1.2	Identifying needs for operational controls.....	41
8.1.3	Establishing operational controls.....	42
8.2	Emergency preparedness and response.....	42
9	Performance evaluation.....	43
9.1	Monitoring, measurement, analysis and evaluation.....	43
9.1.1	General.....	43
9.1.2	Evaluation of compliance.....	44

9.3	Management review.....	47
10	Improvement.....	48
10.1	General.....	48
10.2	Nonconformity and corrective action.....	48
10.3	Continual improvement.....	49
10.3.1	Opportunities for improvement.....	49
10.3.2	Implementation of continual improvement.....	50
Annex A	(informative) Examples of activities, products and services and their associated environmental aspects and environmental impacts, risks and opportunities, and actions.....	51
Annex B	(informative) Phased approach to implementing an environmental management system (based on ISO 14005).....	60
Bibliography	62

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is Technical Committee ISO/TC 207, *Environmental management*, Subcommittee SC 1, *Environmental management systems*.

This third edition cancels and replaces the second edition (ISO 14004:2004), which has been technically revised.
