

Australian/New Zealand Standard™

**Personal eye protection**

**Part 0: Eye and face protection—  
Vocabulary (ISO 4007:2012, MOD)**

## AS/NZS 1337.0:2014

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee SF-006, Eye and Face Protection. It was approved on behalf of the Council of Standards Australia on 20 November 2014 and on behalf of the Council of Standards New Zealand on 13 November 2014.

This Standard was published on 12 December 2014.

The following are represented on Committee SF-006:

Association of Accredited Certification Bodies  
Australasian Fire and Emergency Service Authorities Council  
Australian Chamber of Commerce and Industry  
Australian Dispensing Opticians Association  
Australian Industry Group  
Economic Development Agencies of New Zealand  
Human Factors and Ergonomics Society of Australia  
New Zealand Association of Optometrists  
New Zealand Optical Wholesalers Association  
Optical Distributors and Manufacturers Association of Australia  
Optometrists Association Australia  
Queensland University of Technology  
TestSafe Australia  
University of Auckland  
University of New South Wales  
Welding Technology Institute of Australia

### Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR 101493.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee SF-006, Eye and Face Protection, to supersede AS/NZS 1337.0(Int):2010, *Personal eye protection, Part 0: Eye and face protectors—Vocabulary*.

The objective of this Standard is to provide terms and definitions for eye and face protectors. Additional terms specifically used in AS/NZS 1337.1, which are not defined in this Standard, are defined in AS/NZS 1337.1.

This Standard is an adoption with national modifications and has been reproduced from ISO 4007:2012, *Personal protective equipment—Eye and face protection—Vocabulary*, and has been varied as indicated to take account of Australian/New Zealand conditions. The modifications are specified in Appendix ZZ.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text ‘this International Standard’ should read ‘this Australian/New Zealand Standard’.
- (b) A full point substitutes for a comma when referring to a decimal marker.

The terms ‘normative’ and ‘informative’ are used to define the application of the annex or appendix to which they apply. The ‘normative’ appendix is an integral part of a Standard, whereas the ‘informative’ annex is only for information and guidance.

## CONTENTS

<b>1</b>	<b>Scope</b> .....	<b>1</b>
<b>2</b>	<b>Terms relating to hazards</b> .....	<b>2</b>
<b>3</b>	<b>Terms relating to optical radiation and sources of radiation</b> .....	<b>3</b>
<b>3.1</b>	<b>Terms relating to optical radiation</b> .....	<b>3</b>
<b>3.2</b>	<b>Terms relating to sources of non-ionising radiation</b> .....	<b>7</b>
<b>4</b>	<b>Photometric terms</b> .....	<b>13</b>
<b>5</b>	<b>Terms relating to eye and face protection</b> .....	<b>20</b>
<b>5.1</b>	<b>General terms</b> .....	<b>20</b>
<b>5.2</b>	<b>Terms relating to the geometrical properties of eye and face protection</b> .....	<b>27</b>
<b>5.3</b>	<b>Terms relating to the non-ocular part of eye and face protection</b> .....	<b>31</b>
<b>5.4</b>	<b>Terms relating to welding protection<sup>4)</sup></b> .....	<b>33</b>
<b>5.5</b>	<b>Terms relating to secondary oculars</b> .....	<b>34</b>
<b>6</b>	<b>Terms relating to optical materials</b> .....	<b>36</b>
<b>7</b>	<b>Terms relating to optical properties of components and oculars</b> .....	<b>39</b>
<b>8</b>	<b>Terms relating to the optical properties of oculars, excluding transmittance</b> .....	<b>44</b>
<b>8.1</b>	<b>Terms relating to the oculars</b> .....	<b>44</b>
<b>8.2</b>	<b>Terms relating to the eye and eye-protectors</b> .....	<b>51</b>
<b>9</b>	<b>Terms relating to filters</b> .....	<b>53</b>
<b>9.1</b>	<b>General terms</b> .....	<b>53</b>
<b>9.2</b>	<b>Terms relating to polarized light and polarizing filters</b> .....	<b>70</b>
<b>9.3</b>	<b>Terms relating to welding filters</b> .....	<b>74</b>
<b>10</b>	<b>Terms relating to test equipment</b> .....	<b>80</b>
<b>11</b>	<b>Glossary of abbreviations and symbols</b> .....	<b>83</b>
	<b>Annex A (informative) Spectral weighting functions and spectral distributions</b> .....	<b>86</b>
	<b>Bibliography</b> .....	<b>100</b>
	<b>Alphabetical index</b> .....	<b>102</b>

## INTRODUCTION

This International Standard is based on EN 165, *Personal eye-protection — Vocabulary*, which has been withdrawn.

Although considered, there is no definition describing transmittance or absorptance properties of filters in the short-wavelength range from 380 nm to around 400 nm because there is no agreement at present on what the definition or requirement should be.

Terms relating to mesh visors and additional oculars have been omitted until required for the appropriate standards.

Words in bold within descriptions or notes refer to terms defined within this International Standard.
