Introduction

The aim of this standard is to set out requirements and recommendations for good practice in professional beauty salon services where the safety and satisfaction of the client is important.

Some European countries make a distinction between wellness treatments and beauty treatments while other countries blend these principles. This European Standard applies to all of these services where they are provided by a beauty therapist.

1 Scope

This document provides requirements and recommendations for the provision of professional beauty salon services. These services relate to the delivery of beauty treatments regardless of where the service is delivered.

This document provides requirements and recommendations for the delivery of beauty treatments performed by a suitably qualified beauty therapist. Recommendations are provided for client management to ensure client safety during any beauty treatments. The delivery of beauty salon services is limited to the boundaries of the qualification of the individual beauty therapists obtained through a recognized education provider.

Medical procedures including aesthetic surgical procedures and cosmetic injectable procedures including sclerotherapy are excluded from the scope of this document.

Hairdressing, barbering and body art tattooing services are also excluded from the scope of this document.
