### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR 07378.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CS-018, Safety of Childrens Toys.

The objective of this Standard is to specify methods for the analysis of toy and toy material extracts prepared according to the sampling procedures in AS 8124.10, to enable assessment of compliance with the chemical requirements specified in AS 8124.9.

This Standard is identical with, and has been reproduced from EN 71-11:2005, *Safety of toys—Part 11: Organic chemical compounds—Methods of analysis*.

As this Standard is reproduced from an International Standard, the following applies:

- (a) Its number does not appear on each page of text and its identity is shown only on the cover and title page.
- (b) In the source text ‘this European Standard’ should read ‘this Australian Standard’.
- (c) A full point should be substituted for a comma when referring to a decimal marker.

References to International Standards should be replaced by references to Australian or Australian/New Zealand Standards, as follows:

| <i>Reference to European Standard</i> |   | <i>Australian/New Zealand Standard</i> |   |
|---------------------------------------|---|--|---|
| EN                                    |   | AS/NZS                                 |   |
| 71                                    | Safety of toys  | 8124                                   | Safety of toys  |
| 71-9                                  | Part 9: Organic chemical compounds—Requirements                       | 8124.9                                 | Part 9: Organic chemical compounds—Requirements                       |
| 71-10                                 | Part 10: Organic chemical compounds—Sample preparation and extraction | 8124.10                                | Part 10: Organic chemical compounds—Sample preparation and extraction |

Documents not listed have not been adopted as Australian or Australian/New Zealand Standards.

The term ‘informative’ has been used in this Standard to define the application of the annex to which it applies. An ‘informative ‘annex’ is only for information and guidance.
