### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.standards.com.au](http://www.standards.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

Alternatively, both organizations publish an annual printed Catalogue with full details of all current Standards. For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR 06421.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CS-088, Commercial Furniture and CS-091, Domestic Furniture.

This Standard is identical with, and has been reproduced from ISO 7170:2005, *Furniture—Storage units—Determination of strength and durability*.

The objective of this Standard is to specify test methods for determining the strength and durability of storage units that are fully assembled.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the annex to which they apply. A ‘normative’ annex is an integral part of a Standard, whereas an ‘informative’ annex is only for information and guidance.

As this Standard is reproduced from an international standard, the following applies:

- (a) Its number appears on the cover and title page while the international standard number appears only on the cover.
- (b) In the source text ‘this International Standard’ should read ‘this Australian/New Zealand Standard’.
- (c) A full point substitutes for a comma when referring to a decimal marker.

The International reference in Clause 2 has not been adopted as an Australian or Australian/New Zealand Standard.

## CONTENTS

	<i>Page</i>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 General test conditions</b> .....	<b>3</b>
<b>4.1 Preliminary preparation</b> .....	<b>3</b>
<b>4.2 Test equipment</b> .....	<b>4</b>
<b>4.3 Application of forces</b> .....	<b>4</b>
<b>4.4 Tolerances</b> .....	<b>4</b>
<b>4.5 Sequence of testing</b> .....	<b>4</b>
<b>4.6 Prevention of movement during test</b> .....	<b>4</b>
<b>4.7 Load on parts not subject to testing</b> .....	<b>5</b>
<b>4.8 Inspection and assessment of results</b> .....	<b>5</b>
<b>5 Test apparatus</b> .....	<b>5</b>
<b>6 Test procedures for non-movable parts</b> .....	<b>6</b>
<b>6.1 Shelves</b> .....	<b>6</b>
<b>6.1.1 General</b> .....	<b>6</b>
<b>6.1.2 Shelf retention test</b> .....	<b>6</b>
<b>6.1.3 Deflection of shelves</b> .....	<b>6</b>
<b>6.1.4 Strength of shelf supports</b> .....	<b>6</b>
<b>6.2 Tops and bottoms</b> .....	<b>8</b>
<b>6.2.1 Sustained load test for tops and bottoms</b> .....	<b>8</b>
<b>6.2.2 Static load test for tops and bottoms</b> .....	<b>8</b>
<b>6.3 Strength of clothes rails and their supports</b> .....	<b>8</b>
<b>6.3.1 Strength of clothes-rail supports</b> .....	<b>8</b>
<b>6.3.2 Dislodgement of clothes rails</b> .....	<b>9</b>
<b>6.4 Strength of the structure</b> .....	<b>9</b>
<b>6.4.1 Test for structure and underframe</b> .....	<b>9</b>
<b>6.4.2 Drop test</b> .....	<b>11</b>
<b>6.4.3 Tests for units with castors or wheels</b> .....	<b>11</b>
<b>7 Test procedures for movable parts</b> .....	<b>11</b>
<b>7.1 Pivoted doors</b> .....	<b>11</b>
<b>7.1.1 General</b> .....	<b>11</b>
<b>7.1.2 Strength of pivoted doors</b> .....	<b>12</b>
<b>7.1.3 Slam-shut test of pivoted doors</b> .....	<b>13</b>
<b>7.1.4 Durability of pivoted doors</b> .....	<b>14</b>
<b>7.2 Sliding doors and horizontal roll-fronts</b> .....	<b>15</b>
<b>7.2.1 General</b> .....	<b>15</b>
<b>7.2.2 Slam shut/open test of sliding doors and horizontal roll-fronts</b> .....	<b>15</b>
<b>7.2.3 Durability of sliding doors and horizontal roll-fronts</b> .....	<b>15</b>
