Preface

This Standard was prepared by the Australian members of the Joint Standards Australia/Standards New Zealand Committee ME-005, Cranes.

After consultation with stakeholders in both countries, Standards Australia and Standards New Zealand decided to develop this Standard as an Australian Standard rather than an Australian/New Zealand Standard.

The objective of this Standard is to establish general graphic symbols for use on the controls of cranes and indicates colour for control buttons and signal lamps.

This Standard is identical with, and has been reproduced from ISO 7296 1:1991, Cranes — Graphic symbols — Part 1: General and its Amendment No. 1 (1996) which has been added at the end of the source text.

As this Standard is reproduced from an International Standard, the following applies:

- (a) In the source text “this part of ISO 7296” should read “this Australian Standard”.
- (b) A full point substitutes for a comma when referring to a decimal marker.

Contents

Preface	ii
Foreword	iv
Section 1 General	1
1.1 Scope	1
