

Australian Standard<sup>®</sup>

---

**Wastes, sediments and  
contaminated soils**

**Part 3: Preparation of leachates—  
Bottle leaching procedure**

---

This Australian Standard was prepared by Committee CH/35, Examination of Wastes. It was approved on behalf of the Council of Standards Australia on 30 October 1996 and published on 5 January 1997.

---

The following interests are represented on Committee CH/35:

Australian Aluminium Council  
Australian Government Analytical Laboratories  
Australian Lead Development Association  
Brisbane City Council  
Bureau of Steel Manufacturers of Australia  
Department of Environment and Natural Resources, S.A.  
Division of Coal and Energy Technology, CSIRO  
Environment Protection Authority of Victoria  
Environment Protection Authority of N.S.W.  
Government Chemical Laboratory, Queensland  
Griffith University  
National Association of Testing Authorities  
Plastics and Chemicals Industry Association  
Sydney Water Corporation  
Victorian University of Technology  
Victorian Waste Management Association

---

**Review of Australian Standards.** To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

---

*This Standard was issued in draft form for comment as DR 95140.*

## PREFACE

This Standard was prepared by the Standards Australia Committee CH/35 on the Examination of Wastes and forms part of a series of Standards prepared to provide a standardized method to determine the contamination potential of groundwater with inorganic and semivolatile organic materials from liquid and solid wastes, soils, sediments and sludges.

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendices to which they apply. An 'informative' appendix is only for information and guidance whilst a 'normative' appendix is an integral part of the Standard.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.
