

Australian/New Zealand Standard

**Telecommunications installations—
Administration of communications
cabling systems**

Part 1: Basic requirements

AS/NZS 3085.1:1995

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee IT/17, Integrated Cabling Systems for Buildings. It was approved on behalf of the Council of Standards Australia on 7 October 1994 and on behalf of the Council of Standards New Zealand on 20 January 1995. It was published on 5 February 1995.

The following interests are represented on Committee IT/17:

AT & T New Zealand
AUSTEL
Australian Electrical and Electronic Manufacturers Association
Australian Information Industry Association
Australian Telecommunications Users Group
Building Owners and Managers Association of Australia
Clearfield Consulting, New Zealand
Connector Systems, New Zealand
Department of Defence
Electricity Supply Association of Australia
Institution of Radio and Electronics Engineers Australia
International Facility Management Association
Murray Gillespie, New Zealand
National Electrical Contractors Association
New Zealand AMP
Optus Communications
Telecom Australia
Telecom New Zealand

Review of Standards. To keep abreast of progress in industry, Joint Australian/New Zealand Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Joint Standards and related publications will be found in the Standards Australia and Standards New Zealand Catalogue of Publications; this information is supplemented each month by the magazines 'The Australian Standard' and 'Standards New Zealand', which subscribing members receive, and which give details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Joint Standards, addressed to the head office of either Standards Australia or Standards New Zealand, are welcomed. Notification of any inaccuracy or ambiguity found in a Joint Australian/New Zealand Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee IT/17 on Integrated Cabling Systems for Buildings.

The objective of this Standard is to provide building owners and managers, and those who are required to meet cabling requirements (e.g. installers), with a set of basic specifications for identification and recording of components at the time of installation to aid in administration of application, maintenance and reconfiguration (if necessary) of telecommunications cabling infrastructure.

This Standard references a USA Standard, ANSI/TIA/EIA-606, *Administration Standard for the Telecommunications Infrastructure of Commercial Buildings*, which specifies a comprehensive approach to administration.

The USA document may later be used as a base for the production of a corresponding Australian/New Zealand Standard, which would be Part 2 of this Standard. However, the Committee believes that this 'basic' Standard will meet the requirements of the majority of users.

The term 'informative' has been used in this Standard to define the application of the appendix to which it applies. An 'informative' appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

Users of Standards are reminded that copyright subsists in all Standards Australia and Standards New Zealand publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia or Standards New Zealand may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia or Standards New Zealand. Permission may be conditional on an appropriate royalty payment. Australian requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia. New Zealand requests should be directed to Standards New Zealand.

Up to 10 percent of the technical content pages of a Standard may be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia or Standards New Zealand.

Inclusion of copyright material in computer software programs is also permitted without royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia or Standards New Zealand at any time.
