

ASME PTC 4.4-2008

[Revision of ANSI/ASME PTC 4.4-1981 (R2003)]

Gas Turbine Heat Recovery Steam Generators

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME PTC 4.4-2008

[Revision of ANSI/ASME PTC 4.4-1981 (R2003)]

Gas Turbine Heat Recovery Steam Generators

Performance Test Codes

AN AMERICAN NATIONAL STANDARD

Date of Issuance: January 30, 2009

This Code will be revised when the Society approves the issuance of a new edition. There will be no Addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretation of technical aspects of this Code. Periodically certain actions of the ASME PTC Committee may be published as Code Cases. Code Cases and interpretations are published on the ASME Web site under the Committee Pages at <http://cstools.asme.org> as they are issued.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public at large.

ASME does not “approve,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with established ASME procedures and policies, which preclude the issuance of interpretations by individual volunteers.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

CONTENTS

Notice	v
Foreword	vi
Committee Roster	vii
Correspondence With the PTC Committee	ix
Section 1 Object and Scope	1
1-1 Object.....	1
1-2 Scope.....	1
1-3 Test Uncertainty	2
Section 2 Definitions of Terms, Symbols, and Conversion Factors.....	3
2-1 Definitions of Terms.....	3
2-2 Symbols.....	6
2-3 Conversion Factors.....	10
2-4 Descriptive Figures	12
Section 3 Guiding Principles	18
3-1 Introduction	18
3-2 Planning for the Test.....	18
3-3 Prior Agreements	20
3-4 Test Preparations	21
3-5 Conducting the Test	22
3-6 Calculation, Analysis, and Reporting of Results	25
Section 4 Instruments and Methods of Measurement	28
4-1 Introduction	28
4-2 General.....	28
4-3 Temperature Measurement.....	31
4-4 Pressure Measurement	36
4-5 Flow Measurement	38
4-6 Liquid and Gaseous Fuel Sampling	40
4-7 Power Measurement	41
4-8 Data Collection and Handling	41
Section 5 Calculations.....	43
5-1 Introduction	43
5-2 Intermediate Calculations.....	43
5-3 Gas Flow by HRSG Energy Balance	52
5-4 Gas Flow by Gas Turbine Energy Balance	56
5-5 Weighted Capacity.....	57
5-6 Correction of Test Conditions to Guarantee.....	58

Section 6 Report of Results	61
6-1 General	61
6-2 Section 1: Executive Summary	61
6-3 Section 2: Introduction	61
6-4 Section 3: Test Data	61
6-5 Section 4: Data Reduction, Corrections, and Results	61
6-6 Section 5: Appendices	62
Section 7 Uncertainty Analysis	63
7-1 Introduction.....	63
7-2 Uncertainty Calculation.....	63
7-3 Guidance for Determining Systematic Changes	66
Figures	
2-4-1 Typical Gas Turbine Heat Recovery Steam Generator Diagram	14
2-4-2 Typical Three Pressure Level HRSG With Supplementary Firing	15
2-4-3 Typical Two Pressure Level HRSG With Feedwater Heater and Supplementary Firing.....	16
2-4-4 Typical Single Pressure Level HRSG With Feedwater Heater and Supplementary Firing	17
3-6.2-1 Repeatability of Runs	26
Tables	
3-1-1 Typical Range of Uncertainties.....	18
3-5.3-1 Suggested Maximum Permissible Variations in Test Conditions	24
4-3.2-1 List of Potential Sources and Typical Ranges of Uncertainties	32
4-5.2-1 Maximum Allowable Flow Measurement Uncertainty	38
5-2.4.3-1 Fuel Compound Heating Values	49
5-2.6.3-1 Constituent Enthalpy Equation Constants	50
Mandatory Appendix	
I Exhaust Flow by Gas Turbine Energy Balance	69
Nonmandatory Appendices	
A Sample HRSG Heat Balance Calculations	72
B Sample Gas Turbine Heat Balance Calculations.....	83
C Uncertainty Sample Calculation	93
D Fuel Sensible Heat.....	109
E Gas Enthalpy Equation Derivation.....	111
F HRSG Heat Loss.....	114
G Bypass Damper Leakage	117
H Uncertainty Worksheet Form.....	118
