

ASME B89.4.10360.2-2008

Acceptance Test and Reverification Test for Coordinate Measuring Machines (CMMs) — Part 2: CMMs Used for Measuring Linear Dimensions

AN AMERICAN NATIONAL STANDARD

The American Society of
Mechanical Engineers

ASME B89.4.10360.2-2008

**Acceptance Test and
Reverification Test for
Coordinate Measuring
Machines (CMMs) —
Part 2: CMMs Used for
Measuring Linear
Dimensions**

Date of Issuance: July 11, 2008

This Technical Report will be revised when the Society approves the issuance of a new edition. There will be no addenda issued to this edition.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Report. Interpretations are published on the ASME Website under the Committee Pages at <http://cstools.asme.org> as they are issued.

ASME is the registered trademark of The American Society of Mechanical Engineers.

ASME does not “approve,” “rate”, or “endorse” any item, construction, proprietary device or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

ASME B89.4.10360.2

Acceptance test and reverification test for coordinate measuring machines (CMMs) — Part 2: CMMs used for measuring linear dimensions.

The ASME B89.4.10360.2 Technical Report is based on, and is compliant with, the final draft International Standard (FDIS) ISO 10360-2, expected to be published as an International Standard in 2009. The ISO FDIS text appears verbatim in this Technical Report. Whenever the phrase “International Standard” appears, it refers to the ISO 10360-2 FDIS document. Additional requirements and information specific to the ASME B89.4.10360.2 Technical Report are included in bordered text boxes such as this one. Normative material is a fundamental part of the ASME B89.4.10360.2 Technical Report and, if applicable, supersedes the corresponding ISO 10360-2 normative text. In particular, there are a few cases where text appearing in ISO 10360-2 is in conflict with the Normative text of ASME B89.4.10360.2, and accordingly the ASME B89.4.10360.2 requirements shall govern. The corresponding ISO text has been put into a “strikeout” (~~strikeout~~) font in those cases. Informative material in this Technical Report is meant to provide additional benefit for the reader.

The ISO text, figures, and tables have been reprinted in ASME B89.4.10360.2 with permission of ANSI.

This is a free 5 page sample. Access the full version online.
